VOLUME 10

DECEMBER 2022

## ISU LIBRARY IN NUMBERS

2023 YEAR OF AŞIK VEYSEL

LIBRARY  
ORIENTATION TO  
MEDICAL FACULTY  
ACADEMICANS

AUTHOR OF  
THE MONTH  
HERMAN  
HESSÉ

*Dear Members of the Istinye Family,*

As ISU Library, we start the new year with the news of 3 new service changes. We replaced the library automation program with the KOHA Open Source Coded Automation Program, the discovery tool with SUMMON, and the remote access system with OpenAthens in order to provide services at international library standards, to increase the service quality and to better support your work. We will continue testing these services in January. For any problems you may encounter in these matters, you can contact us via the e-mail address of [kutuphane@istinye.edu.tr](mailto:kutuphane@istinye.edu.tr).

In addition, in order to support academic research and intellectual development, purchases and subscriptions were initiated for 31 databases. We share the information of the databases whose transactions have been completed with you via our e-mail and social media accounts. Our Reference Team for these databases started to receive the necessary training.

We will also provide training for you to use databases effectively. We will share the training calendars with you soon.

We think it is important to convey our professional experience, so we cooperate with different institutions. We aim to increase these collaborations in the coming periods.

We will continue to share all developments and announcements about ISU Library on our ISU Library social media accounts as before.

In the 10th issue of the ISU Library Bulletin, we have included many topics that we believe will be of interest to you. I hope you will enjoy reading our news, the librarian's suggestions and other topics, and I wish success to all our students in their final exams.

Kind regards,

*Bahar Biçen Aras*  
*Library Director*

# 2023 YEAR OF AŞIK VEYSEL

#ISTINYEUNIVERSITY

#ISULIBRARY

#AŞIKVEYSEL

The 50th anniversary of the death of Aşık Veysel, one of the last great representatives of the minstrel tradition with his poems in which joy of life and sadness, optimism and despair are intertwined, were included in the UNESCO commemoration and celebration anniversaries program.

In the 2023 commemoration program of UNESCO, on the other hand, it will be the Fiftieth Anniversary of the death of Aşık Veysel, a world-class folk poet who both illuminates his own world and sheds light on today, with the messages of patriotism, tolerance, joy of life and love reflected in his poems written in a clear and pure language.

# TRAININGS WE ATTENDED IN DECEMBER

**We attended the presentation "Research with Confidence Using the Web of Science Core Collection!" online on 20.12.2022.**

**On 21.12.2022, the Bibliometrics Unit participated in the online training titled "Research Smarter: The Preprint Citation Index".**

**On 22.12.2022, the Bibliometrics Unit participated in the online training titled "Research Strategy and Performance: InCites & Journal Citation Reports & Essential Science Indicators".**

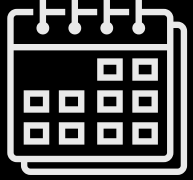

**On 23.12.2022, the Bibliometrics Unit participated in the online training titled "How Inequality is Institutionalized in the Academy: Ranking, Measurement and Impact".**

# #LIFELONGLEARNING

# TRAININGS WE ATTENDED IN DECEMBER

On 29.12.2022, Reference Services Unit received training on "Art & Architecture Archive and Summon Interface Training".

## Otomatik Sorgu Genişletme

The screenshot shows the Summon search interface. The search bar contains 'heart attack'. A dropdown menu is open, showing two options: 'Including "myocardial infarction"' (highlighted with a red arrow) and 'Just search heart attack'. The search results show 1,395,743 results. The first result is 'Myocardial infarction: a companion to Braunwald's heart disease' by Morrow, David A. (David Andrew), published in 2017, available as an eBook.

The screenshot shows the ISU Summon search interface. The search bar contains 'ch\*ter'. The search results show 4,615,337 results. The first result is 'DeepMimic: Example-guided deep reinforcement learning of physics-based character...' by Peng, Xue Bin; Abbeel, Pieter; Levine, Sergey; Daha fazla... published in ACM transactions on graphics, 2018, Cilt 37, Yayın 4. The second result is 'Phonon coherences reveal the polaronic character of excitons in two-dimensional...'. The interface includes filters for 'İçerik Türü' (Content Type) and 'Süreli Yayın Makalesi' (Journal Article).

# AUTHOR OF THE MONTH

## HERMANN HESSE

(JULY 2, 1877 - AUGUST 9, 1962)

One of the most important writers of the 20th century, Hermann Hesse was born in 1877 in Calw, Germany.

He wrote his first poem at the age of twenty-five and became a freelance writer in 1904, reaching more than 100 million readers worldwide with his novels, stories, essays, poetry, political articles and cultural critical writing.

He received the Nobel Prize in Literature in 1946 and the Pour le Mérite Prize in science and art in 1954.

"Even in the most miserable life there are moments when the star shines and little flowers bloom among the sand and pebbles."

Steppenwolf

DECEMBER 2022

## RED TIME

Istanbul in this novel, legends, people, fish, boats, piers, palaces, corridors, severed heads, graves, hospitals, morgues, mermaids, murders, murderers, executioners, madmen, that is, everything is a fabrication. The lies of the legends have been exaggerated, the lives of people have been speckled, the city has been recreated...

*Life is full of quirks, and it's to these quirks that it's bearable.*

# LIBRARIAN SUGGESTS

The exhibition "Digital Serendipity" examines the phenomenon of artificial neural networks in the language of new media art and internet culture. Within the framework of the project, Artificial Intelligence is considered both as a tool and as a philosophical concept, and its impact on contemporary art, culture, people and society is examined.

In the exhibition, the works of young artists who are experimenting with the world's leading names of new media art at the intersection of art and technology, as well as projects produced by coders, researchers and Machine Learning enthusiasts, meet with the audience.

Thanks to its diversity and versatility, modern AI is widely used not only in science, business, healthcare and education, but also in art, design and music. Thus, it helps us to discover not only new planets and medicines, but also new aesthetic forms.

To the exhibition; It is accompanied by a public program of curated tours, artist talks and panels.
