## *Dear Members of the Istinye Family,*

Welcome to the 8th volume of ISU Library Bulletin.

With the start of the academic term, we entered a busy period. In October, we organized and continue to organize trainings in which we explained how our students, academicians and administrative staff, who have just joined the ISU Family, can access the information they need more accurately, reliably and quickly.

We announced that we would add a new one to our Libraries in September. We are happy to announce that Gaziosmanpaşa Medicalpark Medical Faculty Library opened its doors in October. Our Medical Faculty students, who did their internship at the GOP, gained a library where they could do their research and study.

We worked throughout the summer period to provide better service to the ISU Family. One of them was the study of enriching the collection. We ordered the publication lists created for purchase with the contributions of both the ISU Family and the Library. The publications that reach the Library are processed by the Library Technical Services Unit in accordance with international library standards and continue to be added to the collection. We continue our efforts to improve and enrich our collection with your contributions. For this reason, we invite you to visit the "New Arrivals" corner of the Topkapı and Vadi Library. You can find more information about ISU Library facilities on the Library website, and you can follow current developments and feelings on our social media accounts.

September is "Open Science Month" for those who care about and support open science. Therefore, as the Library, we are proud to host an important meeting. The "National Open Science Conference", which has been organized regularly every year since 2011 in our country, is hosted by Istinye University with the theme of "Openness for Climate Justice", which is the main theme of the International Open Access Week this year, with the cooperation of İzmir Institute of Technology, TUBITAK and Hacettepe University. We did it in October 2022. At the conference where we hosted 100 listeners and 14 speakers from 45 different institutions and different cities at ISU Congress Center, we talked about open access from health, law, libraries and education.

With the #Lifelonglearning policy, we attended and organized many trainings this month in order to better serve the ISU Family, provide international library services, and closely follow the developments in our profession. You can find details in the news from us.

On the following pages of the bulletin , you can find author, book, museum and podcast suggestions for you in the librarian suggestions section. We would like to remind you that we are also waiting for your suggestions for this area. I hope you will enjoy reading the 8th issue of our bulletin.

On the 84th anniversary of his death, I commemorate the great leader Gazi Mustafa Kemal ATATÜRK with mercy and gratitude.

Kind regards,

*Bahar Biçen Aras*  
*Library Director*

*"INCRESCUNT ANIMI, VIRESCIT VOLNERE VIRTUS."*

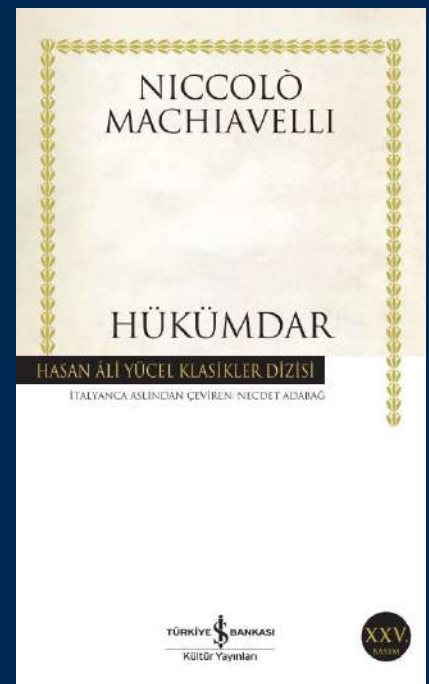

A SINGLE WOUND DEEPENS SPIRITUALITY, DEVELOPS VIRTUES.

If you are strong, you are crowd, if you are weak, you are alone.

The Sovereign, the most famous work of Niccolo Machiavelli, a political theorist, historian, writer and statesman, is an important manifesto that pioneered the establishment of today's understanding of politics. Written to guide the rulers in order to save the fragmented Italy of the period, this book deals with the political philosophy in depth, while giving important information about the essence of humanity, it reveals the relationship between the government and the people in a striking way.
