**MILAN
KUNDERA**

Dear Members of the İstinye Family,

Welcome to the 17th issue of ISU Library Bulletin.

We have accelerated our preparations for the 2023 – 2024 academic year. We are excited to start serving you with the new library building in a short time. We will be here with our printed and electronic resources and services that we have enriched in our new building. You get a library where you can enjoy your academic research and spend your time for a long time.

The support of ISU Library will always be with you in meeting the information needs of all İstinye University members in their research and throughout their education life. You can find more information about the facilities provided by the Library on the Library website and directory.

The support of ISU Library will always be with you in meeting the information needs of all İstinye University members in their research and throughout their education life. You can find more information about the facilities provided by the Library on the Library website and directory.

ISU Library continues to diversify its services with the slogan of #lifelonglearning.

In order to support the academic studies of our academicians and students, we started to prepare the "Scientific Communication" guide on the Library website. We continue to improve this page with the trainings we receive and the notifications we receive from you.

As a library, we attach importance to participating in trainings and working to convey what we have learned in order to provide quality service. We improve ourselves while transferring what we have learned to you. For this reason, we are happy to meet your training demands in every subject. For your training requests, you can fill out the training request form on the Library website.

In the 17th issue of ISU Library Bulletin, we have made suggestions that we believe will be of interest to you, in the section on information about library services and the librarian's suggestions, with news from us.

This year, we are proud to celebrate the 101st anniversary of the August 30 Victory Day. I commemorate with respect and gratitude all our martyrs and veterans who fought for this country, especially Gazi Mustafa Kemal Atatürk, the founder of our Republic. Happy August 30 Victory Day.

Best regards,

Bahar Biçen Aras
Head of Information Resources and Library Department

ISU LIBRARY IS EVOLVING

ISU LIBRARY IS GETTING READY FOR SERVICE WITH ITS NEW BUILDING

In the 2023-2024 Academic Year, the 2 floors of the 4-storey building of the İstinye University Library will be put into service for the users.

IN THE DESIGN OF THE LIBRARY BUILDING HIGHLIGHTS: SUSTAINABILITY

Today, libraries continue their services by redesigning and transforming buildings that were built with special designs determined by their architects or planned to be used for a different purpose. Buildings built or restructured as libraries can have direct or indirect effects on the environment. These buildings bring with them many negative environmental effects (such as energy, water use, production of wastes and the emergence of polluted gases) during the period when they are put into service, restored and demolished.

Increasing environmental threats together with these effects make it necessary to change in construction. Global changes and economic fluctuations together with the developing technology cause a decrease in the resources on earth. New types of green buildings are needed to prevent this reduction. Building type and location affect library services. Green library buildings protect nature and minimize environmental pollution.

Istinye University Library was redesigned considering sustainability, the concept of green libraries and the demands of our users; With its 24/7 working area, group study rooms, individual study areas and plants... While designing the building, important library buildings in Turkey were visited and examined. Istinye University Board of Trustees Chairman Dr. Muharrem Usta, Head of Information Resources and Library Department Bahar Biçen Aras, Head of Information Technologies Department and the team of architects accompanying him visited the Presidential National Library and examined all library materials such as the design of the building, the shelf and table arrangement, the materials used, and the technical equipment.

FRESH PHOTOS FROM THE NEW LIBRARY

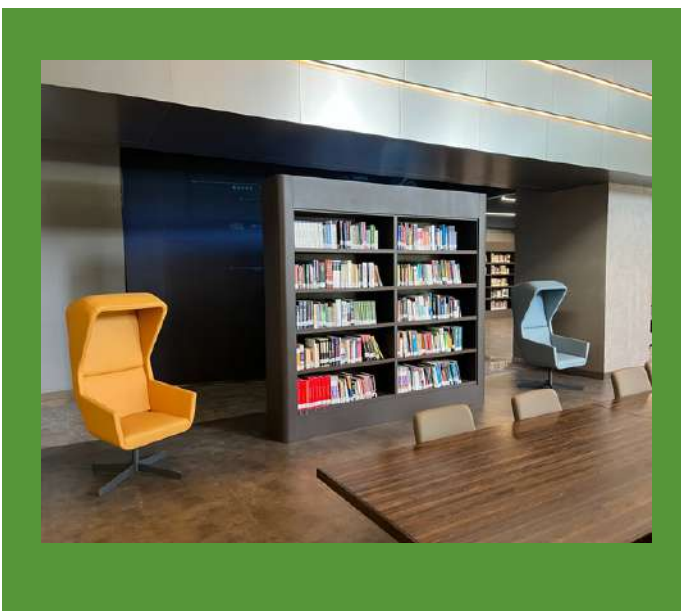

INTERTWINED WITH GREENERY

Reading corners that will take you away from the stress of exams, the intensity of the lessons and the tiredness of the day...

INTERTWINED WITH THE SMELL OF BOOKS

With its architectural design and green friendship that awaits you with different beauties on each floor, the library has reading chairs, shelves waiting for you...

WE ARE READY FOR THE NEW ACADEMIC YEAR

TEMPERATURES ABOVE SEASONAL NORMS

#ClimateChange

Heatstroke (hyperthermia)

It is a serious disorder of thermoregulation in which the body temperature rises uncontrollably.

Symptoms of heatstroke :

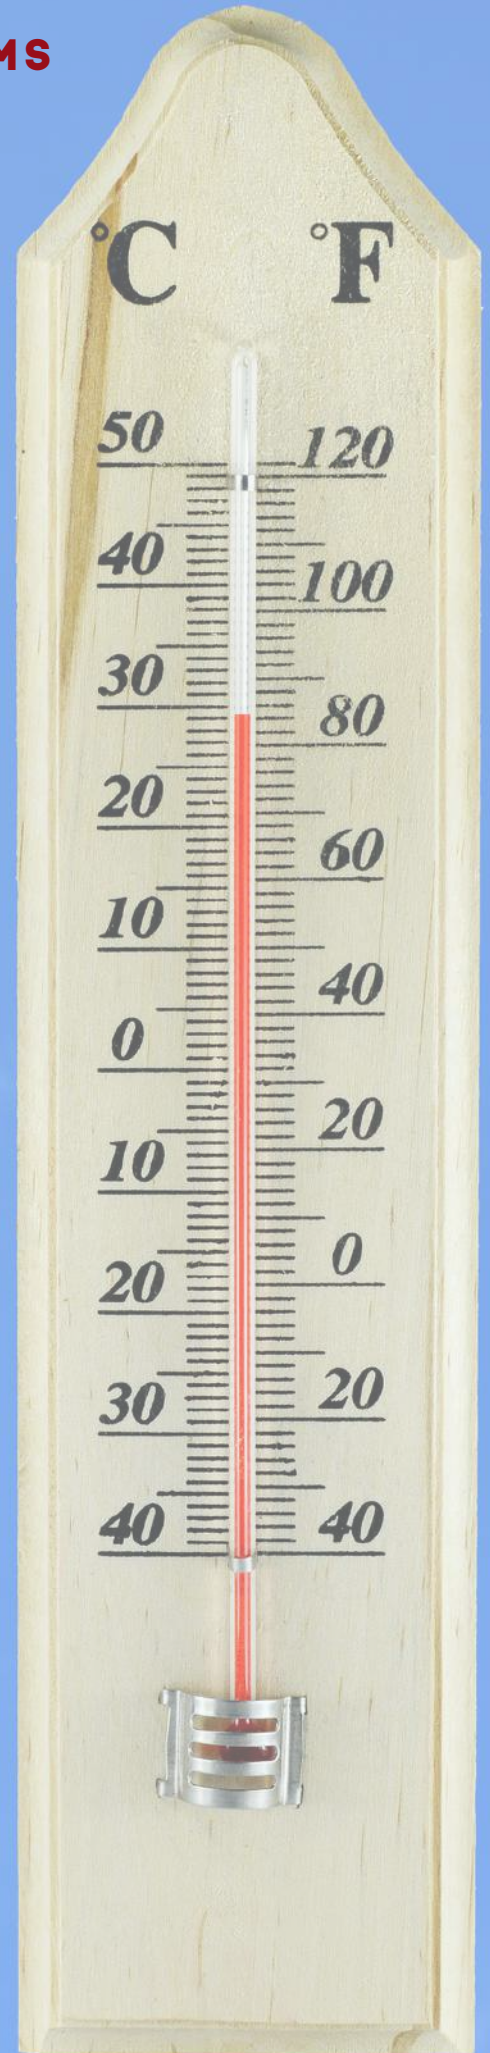

- High body temperature (usually 38°C and above),
- Headache
- Dizziness
- Rapid pulse,
- Breathing difficulties,
- Restlessness,
- Dizziness,
- Sweating or lack of sweating,
- Vomiting
- Changes in consciousness.

To avoid heatstroke:

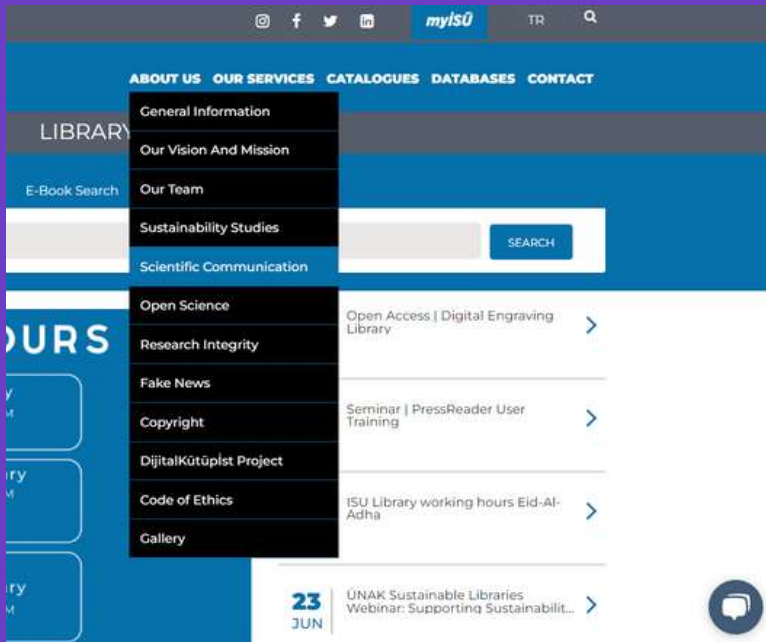

- Stay in cool and shady places,
- Drink plenty of fluids,
- Wear light and breathable clothing,
- Avoid intense physical activity during hot hours,
- Sun protection for the head and body,
- Keeping track of hot weather.

NEW ADDITION TO ISU LIBRARY WEB PAGE

SCIENTIFIC COMMUNICATION WEB PAGE

Scientific communication is undergoing rapid change, influenced by the diversification of the environment in which knowledge is produced and the developments in information technologies. While the environments where information is recorded and made available are gradually moving from printed to electronic, the research and communication environments of scientists are moving to virtual environments with the opportunities provided by technology.

In line with this information, we have prepared the "[Scientific Communication](#)" page to support academic studies.

LIBRARY STUDIES WITHIN THE SCOPE OF SCIENTIFIC COMMUNICATION

Science communicators develop strategies and methods to promote informed decisions about scientific issues. Through effective communication techniques, experts (e.g. scientists) can inform non-experts (e.g. members of the public) about scientific issues and increase public awareness and understanding of science. An informed public has the capacity to think, digest and make sound decisions about science in a democratic society. Scientists can also communicate their ideas and findings more effectively to each other.

You can access the resources in the Library collection to support your scientific studies under the titles below.

E-RESOURCES

ACADEMIC STUDY

OPEN SCIENCE

GUIDES AND FORMS

Databases: Databases in all disciplines recommended for searching journals, articles, theses, etc.

E-journals: E-journal search page covering all disciplines available in the collection

Printed Books ve E-books: Search page for available and accessible printed and electronic books in the collection

Statistics: Access to instant market data with Thomson Reuters EIKON database (For usage, you need to send an e-mail to kutuphane@istinye.edu.tr)

Essential Science Indicators: Determine influential individuals, institutions, papers, publications, and countries in hundreds of disciplines

Journal Citation Reports: Journal performance metrics offer a systematic, objective means to critically evaluate the world's leading journals

InCites Benchmarking & Analytics: Analyze institutional productivity, monitor collaboration activity, identify influential researchers, showcase strengths, and discover areas of opportunity.

Digital Engraving Library

The digitized engravings and maps of the 19th century and earlier periods collected over the years have been made available in Turkish and English as a visual database. The originals of the engravings were scanned and 10,000 works in 27 different categories were digitized.

NADIA COMĂNECI

18 TEMMUZ 1976

#WomenPower

Romanian gymnast Nadia Comăneci was the first athlete to score 10 perfect scores from all judges at the 18th Summer Olympics in Montreal in 1976.

Comăneci was 14 years old when she achieved this feat.

WORLD CHESS DAY

This year marked the 57th anniversary of World Chess Day, which was declared by the United Nations Educational, Scientific and Cultural Organization (UNESCO) on July 20, 1966.

SHISTORY OF CHESS

There is evidence that chess was played in Egypt at least 4,000 years before our time on reliefs in the pyramids. It was also played in China, Mesopotamia and Anatolia. The game got its current name in India in the 3rd-4th centuries AD, when it was called ÇATURANGA. The first written documents about chess are from India.

AUTHOR OF THE MONTH

*The
Unbearable
Lightness of
Being*

*milan
kundera*

MILAN KUNDERA

April 1, 1929 - July 11, 2023

Milan Kundera, author of *The Unbearable Lightness of Being*, *Laughable Loves*, *Not Knowing* and many other immortal works, is one of the most influential novelists of the 20th century.

Milan Kundera's career began with his novel "The Joke". His book "The Unbearable Lightness of Being", which won the Jerusalem Prize in 1985, was banned in his homeland until the late 80s. It was adapted into a movie by Philip Kaufman in 1988.

Milan Kundera, who has been professionally involved in music and cinema for many years, has written 16 works in various fields of literature and received numerous awards. Some of these are

- Medicis Prize (1973)
- Jerusalem Prize (1985)
- Austrian Prize for European Literature (1987)
- Herder Prize (2000)
- Czech National Prize (2007)
- Franz Kafka Prize (2020)

JULY 2023

THE JOKE

The Joke is an important book by a writer who is in a class of his own.' TLS

Ludvik receives a letter from his girlfriend Marketa, from whom he has been estranged for some time. Marketa writes that she is happy with her life and that the revolution in the West will take place soon. Ludvik, angry with Marketa for not missing him, writes on the back of a postcard, "Optimism is the opium of mankind! A healthy spirit is nothing but a jerk. Long live Trotsky!" and sends it to her. These three sentences, which Ludvik wrote as a "joke", would lead to his expulsion from both the Communist Party and the university, and his ostracization from society.

Milan Kundera's first novel, *The Joke*, published in 1967, was a cynical critique of socialist Czechoslovakia. After a while, all of Kundera's works were banned and he was stripped of his citizenship. Forty years have passed since *The Joke* was first published. This striking novel of love and revenge, which stood out in its time for its political references, continues to shed light on the universal themes of human existence today, like any enduring work.

LIBRARIAN SUGGESTS

EXHIBITION

*Lausanne 1923:
The Beginning One Hundred Years Ago*

CASA BOTTER SANAT VE TASARIM MERKEZİ

24 JULY-30 OCTOBER 2023

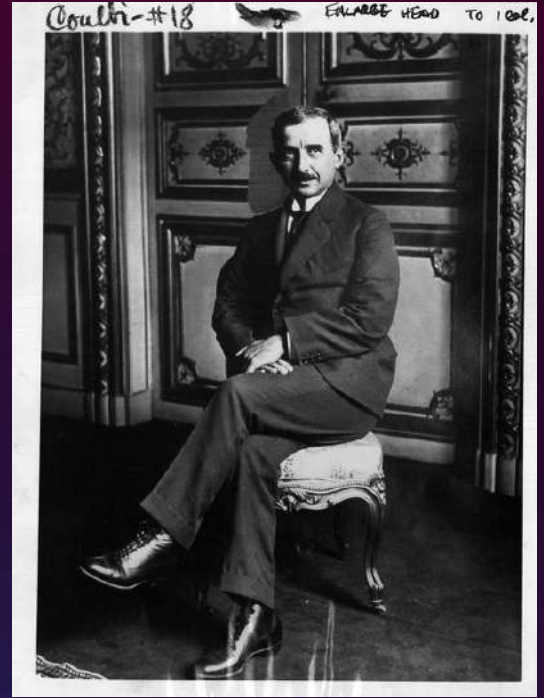

Curator: İzzeddin Çalışlar
Advisor: Prof. Dr. Mehmet Ö. Alkan
Design Tetrazon

On the occasion of its 100th anniversary, IBB opened the exhibition "Lausanne 1923/The Beginning of a Century Ago" at Casa Botter, focusing on the Lausanne Peace Conference. The exhibition, which describes the treaty process with period photographs and documents, will be on view until October 30.

The exhibition, organized by Istanbul Metropolitan Municipality (IBB) within the scope of the Centennial of Democracy events, exhibits pieces from external sources and private collections reflecting the traces of a century ago, especially the archives of IBB Atatürk Library and İnönü Foundation.

The exhibition, which also expresses gratitude to Mustafa Kemal Atatürk, the founding leader of the Republic of Turkey, İsmet İnönü, the chief representative of the Grand National Assembly of Turkey (TBMM), and all his colleagues, conveys to the audience the process that led to the recognition of the victories won at the front by international law through visual and written materials collected from various collections.

[Click here for detailed information about the exhibition.](#)

Journal Impact Factor

In English, impact factor (IF) is an important assessment tool for academic reputation.

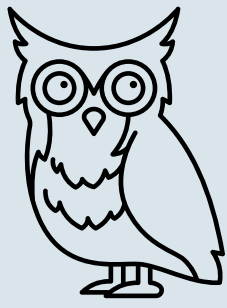

The impact factor (IF) or journal impact factor (JIF) of an academic journal is a science-measurement index calculated by Clarivate that reflects the average annual number of citations received by articles published in a given journal in the last two years.

İlgili:

JIF

Q1

Impact Factor

Turkish Librarians Association (TKD)

Code of Ethics

- 1. They defend the right of access to information, as enshrined in the Universal Declaration of Human Rights, other international conventions and the TKD Declaration on Freedom of Thought, for all members of society and strive to fulfill its requirements.*
- 2. They oppose censorship of intellectual and artistic works and defend freedom of thought.*
- 3. They treat users equally without any discrimination.*
- 4. They make active efforts in the development and implementation of professional policies and standards.*
- 5. They provide accurate and sufficient information in a timely manner and perform their duties in a way that adds value to the profession.*
- 6. Respect and protect copyrights.*
- 7. Guarantee the confidentiality of users' research, borrowed and/or utilized information sources, and do not share their personal information with anyone except when legally required.*
- 8. They do not engage in discourses and behaviors that are not based on objective data and that may damage the reputation of professional staff, a professional group in general or an information center with unfair slander.*
- 9. They do not gain personal benefit while fulfilling their professional duties and responsibilities.*
- 10. Pay attention to professional cooperation and solidarity.*
- 11. They are sensitive about their professional development, continuously improve themselves in this respect and reflect this to their services.*
- 12. They act fairly and honestly in their professional and managerial relations.*

** The principles adopted on 02.04.2010 are the revised version of the Professional Ethical Principles prepared and put into effect in 1996.*
