COLLECTION IS GROWING!

OF THE
MONTH
AUTHOR
HALİDE EDİP
ADIVAR

Dear İstinye University Family,

Welcome to the 20th issue of the Library Bulletin. We have completed another preference period. We are looking forward to our precious students who will join us in the 2024-2025 academic year.

When you come for registration in the new semester, we will welcome you as a library that has grown both physically and with its resources. The Central Library will start to serve on 4 floors. In addition, we will try to support you for better education by enriching printed and electronic resources. İstinye University researchers continue to produce. We started to collect the books of our academicians who contribute to science with their articles and books in a separate collection so that you can examine and benefit from these resources. İSU Authors collection is waiting for you on the ground floor of the Central Library.

The transactions of the printed books we purchased with the suggestions of the academics of the Digital Game Design Department were completed and offered to the service of our researchers.

You can also check out the books on this subject and books on different subjects in the “New Arrivals” area of the Central Library and borrow them if you wish. You can find more information on the Library's web page.

As a library, we attach importance to participating in trainings and working to transfer what we have learned in order to provide quality service. For this reason, we are happy to meet your training requests on any subject. For your training requests, you can fill out the training request form on the Library's website.

In the 20th issue of the İSU Library Bulletin, we have provided introductory information about library services and suggestions that we believe will be of interest to you in the Librarian's Suggestions column. The days are passing quickly. We are close to meeting you and providing you with all kinds of support.

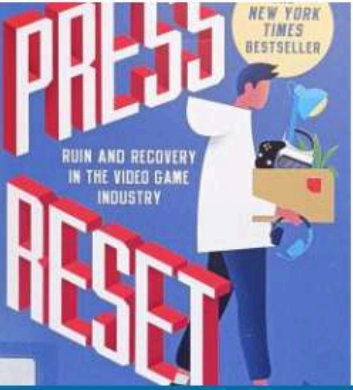

This year, we are proud to celebrate the 102nd anniversary of August 30 Victory Day. I commemorate with respect and gratitude all our martyrs and veterans who fought for this country, especially Gazi Mustafa Kemal Atatürk, the founder of our Republic. Happy August 30 Victory Day.

Best Regards,
Bahar Biçen Aras
Head of Information Resources and Library Department

İSU AUTHORS COLLECTION

The academics of İstinye University, which is rapidly progressing towards a Research University, continue to produce.

We have collected the publications contributed by İstinye University academics in a single collection. You can view the publications under the İSU Authors Collection in the library catalog. The publications are exhibited on the İSU Authors Collection shelf of the Central Library.

PREFERENCE DURING THE PERIOD İSU LIBRARY

OF THE FUTURE İSTİNYE STUDENTS

During the preference period, we told future İstinyeli students about İSU Library, which is located in the center of İSU. For more information

<https://kutuphane.istinye.edu.tr/en>

Taking into account the information needs of students, academic and administrative staff, İSU Library aims to promote and facilitate scholarly participation by providing access to both traditional and innovative resources, fostering excellence in lifelong learning, teaching and research, encouraging and facilitating scholarly participation, and striving to be an inclusive place for innovative research and development by collaborating with colleagues.

İstinye University Central Library is located in Vadi Main Campus, Topkapı Library is located next to the Congress Center (former Student Center) in Topkapı Campus, Liv Hospital Bahçeşehir Faculty of Medicine Library is located in Liv Hospital Bahçeşehir, and Medical Park Gaziosmanpaşa Faculty of Medicine Library is located in Medical Park Gaziosmanpaşa.

İSU Libraries are at the center of research with a total area of 3,383.50 m2, a collection of approximately 43 thousand printed and 200 thousand e-resources and 52 databases with a seating capacity of 631 in group study rooms, super quiet study spaces and research halls.

Author of the Month

Halide Edip Adivar

In the Republican Era, she produced works in many genres such as novels, stories, memoirs, theater poetry. Halide Edip Adivar, who is among the writers who maintain the taste and understanding of National Literature, is referred to in her biography as a witness of her age, a pioneer and a country literary figure. Halide Edip Adivar is a Turkish novelist, educator, politician and academician.

She published her first articles in Tanin Newspaper under the pseudonym “Halide Salih”. Halide Edip Adivar's life was spent briefly working for the participation and education of women in social life and reflecting the inner life of the people. She worked as a teacher, inspector, deputy and academic.

Halide Edip Adivar actually participated in the national struggle and worked in Red Crescent hospitals. After the occupation of Izmir, she participated in many rallies as a speaker.

She is the first well-known female novelist and storyteller of the National Literature Period.

Her works act as a mirror of the period. Halide Edip Adivar is a writer of the 2nd Constitutional Monarchy and Republican Period.

Some of the most important works of Halide Edip Adivar are as follows:

- Yolpalas Cinayeti
- Sinekli Bakkal
- Tatarcık
- Vurun Kahpeye
- Sonsuz Panayır
- Ateşten Gömlek
- Türk'ün Ateşle İmtihanı
- Mor Salkımlı Ev
- Seviye Talip
- Tatarcık
- Harap Mabetler

For Academic Visibility

“ Institutional Academic Archive ”

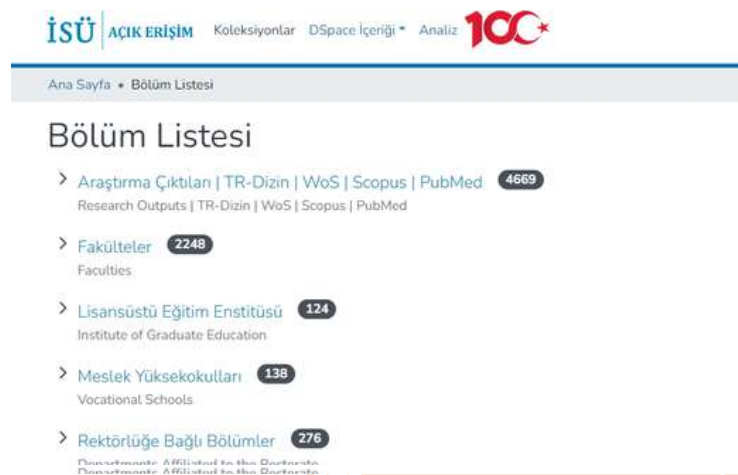

DSPACE 7.6.1

With the update made in the Institutional Academic Archive, you can provide easy access to publications with the filters added from the Analysis section.

You can review collections with index information such as WoS, Scopus, Pubmed.

With DSpace, all kinds of documents produced within the institution can be archived, preserved for a long time and made available on the internet in accordance with copyright. By providing academic metadata and access information to search engines at international standards, DSpace increases the visibility and citation numbers of the institution on the internet.

LIBRARIAN SUGGESTS MUSEUM DENİZ MUSEUM

The Naval Museum was established in 1897 in a small building at the Shipyard-i Amire under the name of "Museum and Library Administration" with the permission of Abdülhamit II and the orders of Minister of Naval Affairs Hasan Hüsnü Pasha of Bozcaada. The museum, which served in different buildings at various times due to periodic conditions, finally moved to its current location in Beşiktaş (formerly used as the finance building) in 1961 and started to serve under the name of "Directorate of Naval Museum and Archive".

In 2005, an architectural project competition was launched. In 2008, the tender for the new museum building was finalized and the construction of the museum, which consists of the Main Exhibition Building, Historical Boats Gallery, Cultural Site and Open Exhibition Areas, was started in accordance with the modern museum concept. First, a temporary warehouse was built to protect the historical boats during the construction process and the boats were moved to this warehouse in 2009. In 2013, restoration works were completed and the Gallery of Historical Boats was opened to visitors on October 04, 2013.

LIBRARIAN SUGGESTS

**ŞÜPHECİNİN EL KİTABI:
BİLGİ ÇAĞINDA GERÇEĞİ BULMAK**

**ARSEL BERKAT ACAR
ÇAĞRI MERT BAKIRCI**

We are used to science books: evolution, quantum physics, medicine, botany, cosmology, geology, chemistry, neuroscience and so on... But how well equipped are we with the most fundamental philosophical stance at the heart of science: scientific skepticism? How good are we at distinguishing between what is real and what is not? Do we know how to distinguish between truth and falsehood, fact and nonsense, or do we just trust our “gut instincts”, our prejudices?

The main purpose of this book is to equip you with a culture of scientific skepticism, so that your toolkit will be much richer and more diverse on your journey into the dizzying world of science.

Are lost cities at the bottom of the oceans waiting to be discovered? Are there mysterious monsters roaming the forests? Have aliens visited ancient people? Are there chakras in our bodies? Are the photos of astronauts walking on the Moon fake? Does astrology have any validity today? Is astral travel possible? Can we move objects with just our mind power?

For some, these questions may seem ridiculous, but for us, like many people, they are important questions. Because the only way to find the truth of something is to discover what is false about it. We get to the truth by carefully identifying and eliminating the untruth.

Why is an argument false? Why is an argument unlikely to be true? Why is a belief so exaggerated that it can be called superstition? This is what skeptics, who are interested in scientific skepticism today, are investigating and searching for the truth behind the veil of mystery.

Of course, we do not have all the secrets of the universe, but we invite you to look at life from a more scientific perspective for a while. Already, commit to memory the following sentence that will echo in your brain throughout the book:

“Until proven otherwise, everything we believe or assume to be true is false.”
