LIBRARY

Dear Istinye University Family,

We are excited to say hello to you with the first issue of ISU Library Bulletin.

I have been working intensively to carry the flag that I took over with my colleagues at the Information Resources Directorate of Istinye University, where I started to work as a Director on January 3, 2022. Istinye University Information Resources Directorate; With its 9 Faculties, 2 Vocational Schools, 3 Institutes and the centers and laboratories under these units, İstinye University has been trying to provide the necessary information and resources to its academicians, students and administrative staff since the day it started its education life. You can find more information about ISU Library facilities on the Library website, and you can follow current developments and announcements on our social media accounts.

In the first issue of our newsletter, we wanted to give you a summary of what we did in 3 months. Our users showed an increasing interest in the library for 3 months. There were days when the number of visitors approached 1600, especially due to the extension of working hours until 22.00. We also observe that the number of visitors has increased thanks to some of the arrangements we have made in the Library.

We celebrate the last week of March every year as Library Week. As ISU Library, we organized a Bibliometrics Workshop as part of the Library Week events, the 58th of which is celebrated this year. We were happy that it was an event that attracted participants from different institutions and made a lot of noise.

We believe that our column where we talk about two values of our country and the suggestions from the librarian will attract your attention.

We will prepare the ISU Library Bulletin every month and present it to your liking. We hope you enjoy reading this first issue of our newsletter.

Kind regards,

Bahar Biçen Aras
Library Director

With the arrangement we made in ISU Library, we opened a quiet study area for 188 people, a research area with a seating capacity of 90 and a computer area for 52 people.

We have defined the right to extend 3 times for all our users. If the books you borrowed have not been reserved by another user, you can extend the book 3 times through your library account to use the book for a longer period of time.

Our Rector Prof. Dr. Erkan İbiş made the opening speech of the Bibliometrics Workshop. In his speech, he mentioned the importance of libraries and employment of Information and Document Management Department graduates in libraries. He also underlined that libraries should respond to today's needs by diversifying their services.

Our Bibliometrics Unit Executive Ayfer Özcan made a presentation titled "Bibliometric Studies in Libraries: Academic Performance Losses" in the second part of the workshop.

After the Bibliometrics Workshop, which we held as the Istinje University Library team, we made our analysis and took our notes.

We have renewed our web page. We are now here with a new color, design and service.

Our Book Suggestions

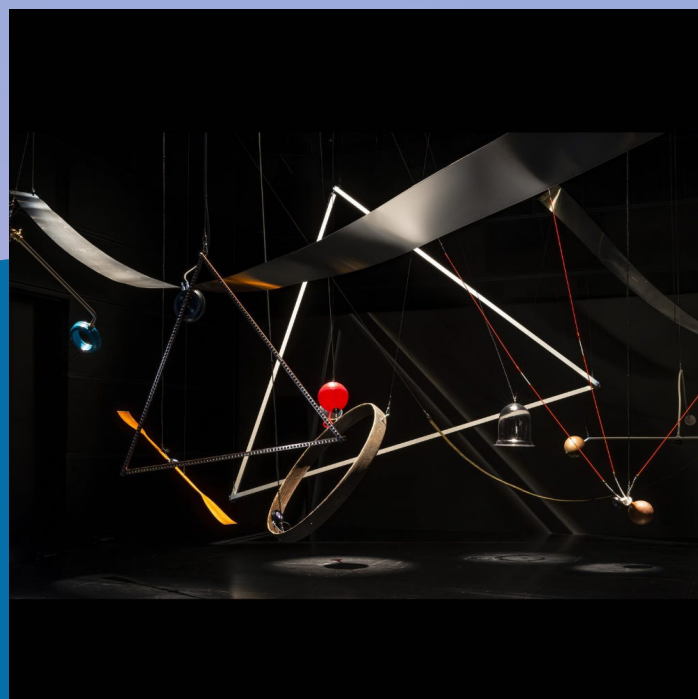

SUGGESTIONS FROM THE LIBRARIAN

TO REACH SHAKESPEARE'S "ROMEO AND JULIET" AT ISU LIBRARY

Two hostile families living in Verona, Italy... And the children of these hostile families in love with each other... What is love? An innocent feeling or an obsession that turns into danger? What does he do for human love? What does it go against? What does he give up? Romeo and Juliet, Shakespeare's world's most known romantic tragedy, will be at DasDas on April 29.

The Rainforest series originated when choreographer Merce Cunningham ordered a piece of music from David Tudor for a dance show of the same name in 1968. In this interactive installation, 20 finds and structured objects such as large buoys, plastic barrels, a copper cauldron, a flower pot, and a badminton racket disperse through the air, while the differently intervened and combined objects vibrate with signals from the pre-recorded audio files, clearly promoting the discovery of the audience. They create a sustained soundscape. The exhibitions For Listening Eyes and Rainforest V (variation 3), which are held simultaneously at Arter, are closely related to each other through the concepts of sound and silence, and work as a single exhibition with two components. You can visit the exhibition until April 30, 2022.
